- Publications (for the scientific conferences organized by TUM)
 - The Disjoint-Set Data Structure and Its Performance
 - JADE - A General Purpose Language
- „Reconnecting – FAF Hackathon”, 8th edition
18 Jun 2022 - 19 Jun 2022

WORK EXPERIENCE

Smartdata | Oct 2022 - Nov 2022

In this internship that lasted 8 weeks, my team and I were developing a budget tracking application. We created a full working mobile app, and I was responsible for the front end, which was developed on Flutter.

JivyGroup | Jan 2023 - Apr 2023

During my 3-month internship at JivyGroup, I had the opportunity to work as a frontend intern. In the first phase of the internship, I focused on studying the fundamentals of frontend development, then, I focused on advanced JavaScript, Bootstrap, and jQuery. As I progressed, I gained experience with TypeScript, React, Redux. Finally, I worked on an internal project of the company, built with ReactJS, antd, auth0/auth0-react, craco, TypeScript and react-redux. This experience provided me with hands-on experience with the latest tools and technologies in frontend development, as well as the opportunity to work on a real-world project as part of a team.
